

NEW

Experience customized comfort

Unlike other climate control systems that are designed to make the room comfortable, the new FH-Series from Mitsubishi Electric has a radically different approach. It's designed to make **you** comfortable. With innovative 3D thermal sensing technology and more precisely articulated air vents, the new FH-Series is the master of **customized comfort**.

MS7-FH09/12/15NA – Available July 2014

3D i-see Sensor – The new look of comfort

Introducing another brilliant advancement from the leader in comfort innovation. The 3D i-see Sensor from Mitsubishi Electric scans the entire room and divides it into 752 zones, detecting exactly where you and your family are located based on your unique body temperature. **The 3D i-see Sensor is so precise, it can even differentiate between people and pets!** With this thermal data, it then directs the perfect amount of heating or cooling towards those who need it most. And when you leave the room, it automatically switches into energy-saving mode to help save you money. When it comes to ensuring your family's comfort, we're always looking out for you. (Available in FH09/12/15NA models.)

3D i-see Sensor
Moves left to right to scan the entire room in three dimensions, detecting your exact location based on body temperature. So precise, it responds only to people, and not pets.

Direct/Indirect Air Flow
Enhance comfort by averting airflow away from people, or set direct airflow to target people for quick heating/cooling.

Absence Detection
When no one is in the room, the unit automatically switches to energy saving mode.

Nano-Platinum filtration system

Our Nano-Platinum air filtration system improves the air quality of your home and the health of your family. It effectively removes the four major air pollutants that are leading causes of illness – bacteria, viruses, allergens and dust. As it improves the air quality of your home, it also deodorizes the air, so every breath you take smells clean and fresh.

(Available in FE18NA and FH09/12/15NA models.)

Natural Flow & Double Vane

The most important part in creating “healthy” airflow is that the flow of air feels natural. Mitsubishi Electric’s solution to this is Natural Flow, only possible thanks to our new, highly articulated vanes. This continuous gentle breeze provides enhanced comfort by avoiding the unpleasant feeling that results from constant, unnatural airflow.

Additionally, Mitsubishi Electric’s Double Vane technology separates the airflow in the left and right directions to deliver airflow not only across a wide area of the room, but also simultaneously toward two people in different locations.

(Available in FH09/12/15NA models.)
